PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Sample American Pie Disposable Vape

Sample ID	SD230621-139 (79539)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	Indacloud		
Sampled	-	Received	Jun 21, 2023
Analyses executed	CANX	Reported	Jun 27, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 9.32%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe (Δ⁸-THC or Δ⁹-THC). At this time there are no reference standards available for (Δ⁸-THC, Δ⁹-THC). Δ⁸-THC is a different compound from the main (Δ⁹-THC) cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced techniques available, the separation of (Δ⁸-THC and Δ⁹-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (Δ⁸-THC and Δ⁹-THC with the majority, if not all, of the concentration being (Δ⁸-THC). Concentration is estimated to be: 55.04%.

CANX - Cannabinoids Analysis

Analyzed Jun 27, 2023 | Instrument HPLC-VWD | Method

The expanded uncertainty of the Cannabinoid analysis is approximately 9.806% at the 95% Confidence Level

PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Sample **American Pie Disposable Vape**

Sample ID	SD230621-139 (79539)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	Indacloud		
Sampled	-	Received	Jun 21, 2023
Analyses executed	CANX	Reported	Jun 27, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 9.32%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we sell (+)-8-THC or D9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced techniques available, the separation of (+)-8-THC and D9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and D9-THC with the majority, if not all, of the concentration being (+)-8-THC. Concentration is estimated to be 55.04%.

CANX - Cannabinoids Analysis

PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Sample **American Pie Disposable Vape**

Sample ID	SD230621-139 (79539)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	Indacloud		
Sampled	-	Received	Jun 21, 2023
Analyses executed	CANX	Reported	Jun 27, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 9.32%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we sell (+)-8-THC or D9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced techniques available, the separation of (+)-8-THC and D9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and D9-THC with the majority, if not all, of the concentration being (+)-8-THC. Concentration is estimated to be 55.04%.

CANX - Cannabinoids Analysis

Analyzed Jun 27, 2023 | Instrument HPLC-VWD | Method

PharmLabs San Diego | 3421 Hancock St, Second Floor, San Diego, CA 92110 | 619.356.0898 | ISO/IEC 17025:2017 Certification L17-427-1

*This report shall not be reproduced except in full, without the written approval of the lab. This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results on "in-process" lots, unless indicated otherwise, when a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not a Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.
