Sample **CR + D8 Cartridge - Glueberry Express - 1 Gram - CRC220510 - 2**

Sample ID	SD221012-018 (53489)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	Canna River	Received	Oct 11, 2022
Sampled	-	Reported	Oct 14, 2022
Analyses executed	CANX		

**Laboratory note:** The estimated concentration of the unknown peak in the sample is 11.17% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-THC or (-)-THC. At this time there are no reference standards available for (+)-THC. (+)-THC is a different compound from the main (-)-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-THC and (-)-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-THC and (-)-THC with the majority, if not all, of the concentration being (-)-THC. Total d8-THC is estimated to be 80.93%.

Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.
